Yelp! Inc

Positions Available: Internship, Full Time

Majors Recruiting: 6

Yelp has been changing the nature of how people share local knowledge and find out about what's going on in their city and beyond since 2005. We're one part community, one part local city guide, with an opinion on everything from mechanics and martini bars to dentists and dining, and everything in between. Doesn't that sound like something you'd want to be involved in?

panjiva

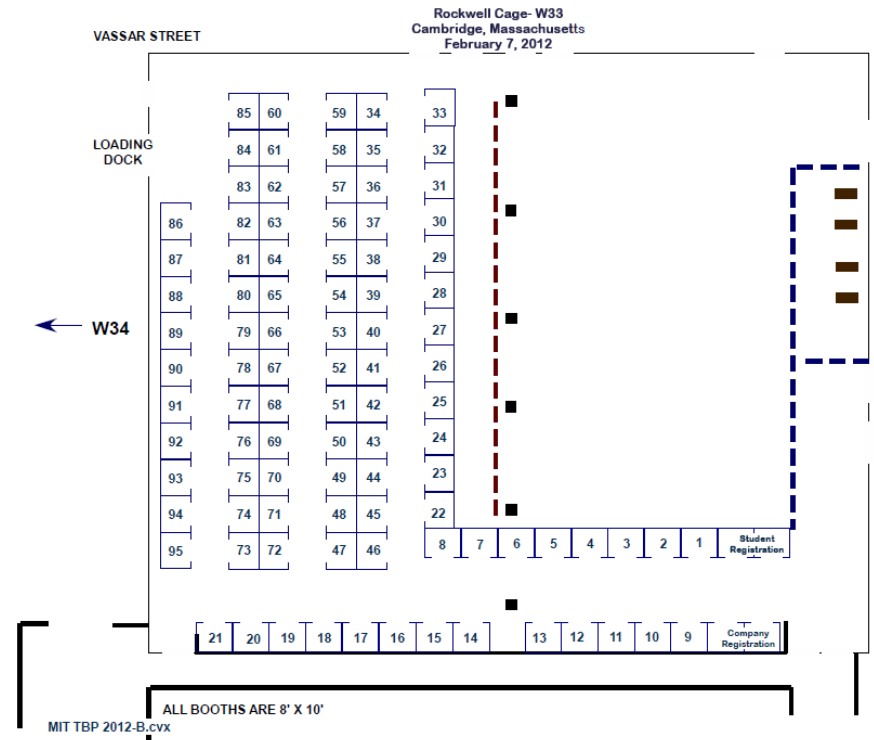

Positions Available: Internship, Full Time

Majors Recruiting: 6

Panjiva is a global trade platform that makes it easy for companies to find suppliers around the world. We're a small, venture-backed startup based out of Cambridge, MA and many of our engineers are Course VI alums. We do a lot of data mining, data visualization, and large-scale web application work. Check out more details at

<http://panjiva.com/jobs>

The founders have developed a visionary approach to enterprise mobility. It provides companies and their employees with all the power of task-specific, bi-directional, transactional, secure enterprise access, yet it requires no programming or code and, as a result, introduces no bugs or security holes. It's technology that preserves and extends the value of companies' IT investment, providing enterprise mobility in minutes on any smartphone or tablet.

Yahoo! is the premier digital media company. We deliver your world, your way by creating deeply personal digital experiences that keep more than half a billion people connected to what matters most - across devices and around the globe. And it's the Yahoos behind the scenes who make this all possible. We are energetic, idea-driven people who are passionate about shaping the future of the digital world. So if this sounds like you, come show us what you've got!

Think about impacting 1 out of every 2 people online—in innovative and imaginative ways that are uniquely Yahoo! We do just that each and every day, and you could too. After all, it's big thinkers like you who will create the next generation of Internet experiences for consumers and advertisers across the globe. Now's the time to show the world what you've got. Put your ideas to work for over half a billion people.

Positions Available: Internship, Full Time

Majors Recruiting: 6

Webalo was founded (and is run by) IT industry veterans – people who have successfully changed the way in which businesses use software to improve operations and their bottom lines.

In developing Webalo's enterprise mobility technology, they have redefined the way in which companies can connect mobile employees to the enterprise data and tasks they rely on. Each employee's individualized connection to the enterprise is achieved with a simplicity that's 100x faster than traditional mobile application development and a fraction of the cost. As a result, Webalo makes both IT and business users more productive, lowers overhead (by eliminating coding, consultants, and compromise along with cost of additional software and hardware), and extended the value of existing enterprise applications and mobile devices.

As AI pioneers, they developed multiple-award-winning technology that consistently enabled Fortune 100 companies to streamline complex activities, measurably improve productivity, and lower costs. They then applied that experience to create natural language search techniques that were far more powerful than text search or Boolean logic.

With that know-how, they took the first steps toward taming the burgeoning content on the World Wide Web. Their early search engine paved the way for today's industry giants. And their innovations in real time recommendations proved the effectiveness of predictive analysis in helping website visitors more easily and accurately find the content, products, and services they were trying to find... without infringing on visitors' privacy.

In every instance, the goal was to augment existing technologies – to allow legacy systems and data to be part of the latest business practices and requirements. The same is true at Webalo.

Majors Recruiting: 6, 8, 18

For more than three and a half decades, Oracle has been the leader in database software. And as it has further developed technologies and acquired best-in-class companies over the years, that leadership has expanded to the entire technology stack, from servers and storage, to database and middleware, through applications and into the cloud.

At Oracle, exceptional is expected. We provide the world's most complete, open, and integrated business software and hardware systems. With more than 370,000 customers in over 145 countries around the globe, Oracle technology can be found in nearly every industry. It takes an astonishing group of people to drive Oracle's future. Now is a great time to join Oracle in the creation of next generation software and hardware innovations. No matter which role or team you choose, you'll work with the most advanced technology.

We seek ambitious, energetic individuals to join us in these roles:

- Computer Scientists
- Software Developers
- Hardware Engineers
- Chip Designers

... and many more.

Majors Recruiting: 2, 6

Founded by David Karp in New York City in 2007, Tumblr is a microblogging platform that allows users to effortlessly share anything. Tumblr now hosts over 30 million blogs with over 10 billion posts to date. Our pageview to engineer ratio is 1 billion PV per month to 1 engineer. This means every line of code every developer writes has a huge impact. We are focused on building tools and technologies that will advance the state of the art in dealing with massively scaled websites as we quickly grow past 30,000 requests and 3,000 posts per second. We are also excited to deliver a range of new products that will enable users to share their own creative content, discover content, and connect to one another in new ways.

With three decades serving these clients, SRA delivers the expert knowledge, technical tools and trusted solutions for missions that matter — to us, our clients and the world.

SILVER SPONSORS

Positions Available: Software Engineer, Software Engineer Intern

Majors Recruiting: 6

Dropbox was founded in 2007 by Drew Houston and Arash Ferdowsi. Frustrated by working from multiple computers, Drew was inspired to create a service that would let people bring all their files anywhere, with no need to email around attachments. Drew created a demo of Dropbox and showed it to fellow MIT student Arash Ferdowsi, who dropped out with only one semester left to help make Dropbox a reality. Guiding their decisions was a relentless focus on crafting a simple and reliable experience across every computer and phone. Drew and Arash moved to San Francisco in fall 2007, secured seed funding from Y Combinator, and set about building a world-class engineering team. In fall 2008, Sequoia Capital led a \$7.2M Series A with Accel Partners to help bring Dropbox to people everywhere. Recently, Dropbox's tremendous growth was evidenced by its October 2011 announcement of nearly 45 million users and successful completion of \$250 million in Series B financing led by Index Ventures.

Palantir Technologies is working to radically change how groups analyze information.

We were founded in 2004 by a handful of PayPal alumni and Stanford computer scientists. Since then we've doubled in size every year while retaining our early-stage values: a startup culture, strong work ethic, and rigorous hiring standards.

We currently offer two products: Palantir Government and Palantir Finance. Both are platforms for integrating, visualizing, and analyzing the world's information. We support many kinds of data including structured, unstructured, relational, temporal, and geospatial. Our products are built for real analysis with a focus on security, scalability, ease of use, and collaboration.

Palantir Government is broadly deployed in the intelligence, defense, and law enforcement communities, and is spreading rapidly by word-of-mouth. Palantir Finance is in use at some of the world's leading hedge funds and financial institutions.

Palantir is headquartered in sunny downtown Palo Alto, CA with offices in Tysons Corner, VA, New York and London, UK.

DIRECTV (NASDAQ: DTV) is one of the world's leading providers of digital television entertainment services delivering a premium video experience through state-of-the-art technology, unmatched programming and industry leading customer service to more than 30 million customers in the U.S. and Latin America. In the U.S., DIRECTV offers its 19.4 million customers access to more than 170 HD channels and Dolby-Digital® 5.1 theater-quality sound, access to exclusive sports programming such as NFL SUNDAY TICKET™, Emmy- award winning technology and higher customer satisfaction than the leading cable companies for eleven years running. DIRECTV Latin America, through its subsidiaries and affiliated companies in Brazil, Mexico, Argentina, Venezuela, Colombia, and other Latin American countries, leads the pay-TV category in technology, programming and service, delivering an unrivaled digital television experience to more than 10.6 million customers. DIRECTV sports and entertainment properties include three Regional Sports Networks (Northwest, Rocky Mountain and Pittsburgh) as well as a 60 percent interest in Game Show Network. For the most up-to-date information on DIRECTV, please visit www.directv.com.

DRW TRADING GROUP

Positions Available: Internship

Majors Recruiting: All

DRW Trading Group is a principal trading organization, meaning all of our trading is for our own account, and all of our methods, systems and applications are solely for our own use. Unlike hedge funds, brokerage firms and banks, DRW has no investors, clients or customers. DRW trades actively in a wide range of assets classes both domestically and internationally.

DRW Trading Group seeks to identify and capture opportunities in the global markets by leveraging and integrating technology, risk management and quantitative research. Since our inception in 1992, we have acquired extensive knowledge and built an organizational infrastructure that enables us to efficiently access the financial markets. Applying our experience, we have organically developed viable and diverse trading strategies that have positive expected value relative to their associated risks. With an entrepreneurial mindset, we are constantly refining our existing businesses and developing new strategies.

An integral aspect of DRW's business is our approach to risk management. By definition, as market professionals, we take financial risk. In order to do so confidently, we devote ourselves to understanding and measuring the risks associated with our trading strategies. Our risk management methodology treats each of our trading operations and their respective subtleties individually. Like our trading, our processes for managing risk are constantly improving and evolving, and are a critical component of our business.

DRW is headquartered in Chicago and has offices in New York and London. We currently employ over 450 people worldwide from many different disciplines and backgrounds.

We're an MIT-founded startup building a product that will fundamentally change how you experience restaurants. We're not just building an ephemeral website or apps – we're building an actual tablet and some amazing software that allows restaurant guests to browse menus, order, play games, and pay - right from their seats without having to wait. Your grandmother would use this product. Learn more about us at www.elacarte.com
